

The legendary Noorduyn Norseman is arguably the oldest, essentially unmodified transport design in the world that continues to fly in its intended role, although we are now moving into the private collector, warbird, nostalgic flights and air show phase.

There are 25 Norseman on the current Canadian Civil Aircraft Register, but 16 are not actively flying. See page 2. Note; \*CF-BSB is presently on the historical register.

Four known active airworthy Norseman reside outside Canada, including LN-TSN (Norway) and N164UC, N364FQ, N78691 (United States). See page 3.

There are many more Norseman on static display throughout the world. The primary intent of this list is to provide a reference for the Norseman community and enthusiasts about the worldwide active airworthy or under restoration to airworthy examples 89 years after the prototype, CF-AYO took to the sky on November 14, 1935. Keep them flying!

Based on the Canadian Civil Aircraft Register, then web surfing, email, telephone calls, direct contact and feedback to bring this list as up to date and accurate as possible. Thank you to all for your help. The register continues to carry numerous outdated entries. If you have any verifiable information to add or delete, I would like to hear from you.
